Work Experience

Junior Software Engineer
Oct 2019 - Present
Pasig City, PH

Workforce Optimizer
Built a progressive web application with React that allows doctors and nurses to create complex surgery schedules based on the availability of equipment and human resources. The app runs on a small RESTful web service that acts as a proxy to the database of the main application.

Web Developer Intern
June 2018 - July 2018
Taguig, PH

Accenture
Overhauled a proprietary online service portal that serves Accenture employees with documents and templates that are reused often. Said portal ran on Spring and Hibernate, with Thymeleaf serving the front-end.

Co-Curricular Experience

Front-end Web Developer
2017 - 2019
Quezon City, PH

Talakayang Alay sa Bayan (TALAB) Website Team
Helped build the landing page and enlistment website for TALAB, which is an annual one-day event held by the Loyola Schools. I mostly worked on the information site using Bootstrap and JQuery, although I also maintained and updated the enlistment site for the later iterations of the event.

Product Designer
2017 - 2019
Quezon City, PH

User Experience Society
Served as one of the designers in the Consultancy team of UXS. Working directly with our content strategists and illustrators, I created high-fidelity prototypes on Figma based on our team's research and the client's needs.

Competencies

Web Development: React, JavaScript, HTML, CSS / SCSS / SASS, AntDesign, Bootstrap, Gatsby, Spring, Hibernate, Thymeleaf
